

Regenerative urban landscapes

Spatial Development Seminar
Summer Semester 2026

UNIVERSITÄT
LIECHTENSTEIN

LSA

Liechtenstein School of Architecture
Urban Design and Spatial Development Unit

In this seminar, key topics of high relevance for the spatial development of contemporary urban landscapes are taught. These are approached in a transdisciplinary manner and embedded in a holistic view. Based on the principles of decarbonisation, adaptation to climate change, the fostering of biodiversity and an inclusive and equitable distribution of space, spatial design is understood as a key to the spatial discourse. During the semester, students engage intensively with and analyse selected spatial development and/or urban design projects based on impulses, discussions, readings and case studies from practice.

Tutor: Fabian Hörmann, core elective, 4 ECTS, 24 lessons (+ 102 h private study time), Friday 8:30 to 11:45 (06.02. / 20.02. / 13.03. / 27.03. / 24.04. / 22.05.), min. enrolment: 5 students, assessment: minimum 75% compulsory attendance and continuous assessment. The final grade is calculated according to the weighting of the following components: final submission (80%) and oral presentation (20%). Relevant reading will be made available at the beginning of the course. A list of recommended literature will be announced in the course and updated on an ongoing basis.
